THE FLORIDA DEPARTMENT OF HEALTH IN PINELLAS COUNTY

protects, promotes and improves the health of all people
in Pinellas County

PUBLIC HEALTH PREPAREDNESS

We protect you during man-made and natural disasters, including staffing Special Needs Shelters during hurricane activations.

ENVIRONMENTAL HEALTH

We license and inspect school cafeterias, tattoo businesses and many other places to protect your health. Healthy Beaches tests water quality at 10 popular beaches.

MATERNAL & CHILD HEALTH

We improve families through support and education and protect infants and children from abuse and neglect.

WIC

We improve nutrition for pregnant and breastfeeding moms and provide supplemental nutrition for babies and children until they start school.

BREAST & CERVICAL CANCER SCREENINGS

We protect uninsured women ages 50-64 by providing cancer screenings that save lives through early detection.

BIRTH & DEATH CERTIFICATES

We improve the process to get Florida birth & death certificates. Get them in person, by mail or online.

DENTAL SERVICES

We improve the health of children and adults in Pinellas by providing dental screenings and services at our centers. Children receive dental sealants and fluoride that protect their teeth from decay.

PRIMARY CARE

We work with Pinellas County Government to provide medical services to low-income, uninsured adults at our health centers from Tarpon Springs to St. Petersburg. School-based clinics are in five area high schools to serve students' health needs.

IMMUNIZATIONS

We protect the community from preventable diseases via vaccines provided at no cost to children and youth. Adults can access them at a cost. We provide travel vaccines and consultations at our Mid-County center.

DISEASE CONTROL

We protect the community from communicable diseases such as TB, STDs and HIV/AIDS by providing education, testing and, in some cases, treatment. Testing is confidential.
