NEW ONSITE SEPTIC APPLICATION PACKET

Packet cannot be accepted until checklist is complete.

Checklist:

☐ Completed Application Form (Instructions are attached)  
Applications will not be accepted without an address and parcel number. Applicant must include a WRITTEN address confirmation from the appropriate building or utilities department.

☐ Completed Site Plan (Drawn to scale)

☐ Completed Site Plan Information sheet

☐ Letter of authorization required if someone other than property owner is applying for the permit.

☐ Accurate floor plan of proposed and/or existing structure.

☐ Letter of non availability of sanitary sewer service must be submitted at time of application.

☐ Fee of $400.00 (If soil evaluation is submitted, the fee is $285.00) Please make checks payable to Florida Department of Health in Pinellas or FL DOH-Pinellas.

After submitting application, please mark the location of the proposed septic site with a stake or flag indicating proposed septic area. Please also place a flag or stake at the street at the front of the property. We will call you or send out the permit within ten working days. If you have not received a call within that time please call (727) 538-7277 and inquire as to the status of your application.

Instructions for Application – No applications will be accepted without a parcel ID number and an address. This may be obtained from the local building department.

APPLICATION FOR: Check type of permit, if "Other" specify type in blank.

APPLICANT: Property owner's full name.

AGENT: Property owner's legally authorized representative.

TELEPHONE: Telephone number for applicant or agent.

MAILING ADDRESS: P.O. Box or street, city, state and zip code mailing address for applicant or agent.

LOT, BLOCK, SUBDIVISION Lot, block, and subdivision for lot (recorded or unrecorded subdivision). If lot is not in a recorded subdivision, a copy of the lot legal description or deed must be attached.

PLATTED: Official date of subdivision recorded in county plat books (month/day/year) or date lot originally recorded. Dividing an approved lot into two or more parcels for the purpose of conveying ownership shall be considered a subdivision of the lot.

PROPERTY ID#: Property/parcel ID can be found on the building department application or on your county property tax form.

ZONING: Specify zoning and whether or not property is in industrial and manufacturing zoning or equivalent usage.

PROPERTY SIZE: Net usable area of property in acres (square footage divided by 43,560 square feet) exclusive of all paved areas and prepared road beds within public rights-of-way or easements and exclusive of streams, lakes, normally wet drainage ditches, marshes, or other such bodies of water. Contiguous unpaved and non-compacted road rights-of-way and easements with no subsurface obstructions may be included in calculating lot area.

WATER SUPPLY: Is the water supply a new well, existing well, or public water? If public will the flow exceed 2000 GPD?

SEWER AVAILABILITY: Is there a legally operating public or private sewerage system available and distance to sewer in feet.

PROPERTY ADDRESS: Street address for property. A street address and folio number are mandatory and are obtained when applying for a building permit.

DIRECTIONS: Provide detailed instructions to lot or attach an area map showing lot location.

BUILDING INFORMATION: Check residential or commercial.

TYPE ESTABLISHMENT: List type of establishment from Table II, Chapter 64E-6, FAC. Examples: single family, single wide mobile home, restaurant, doctor's office.

NO. BEDROOMS: Count all rooms designed primarily for sleeping and those areas expected to routinely provide sleeping accommodations for occupants.

BUILDING AREA: Total square footage of enclosed habitable area of dwelling unit, excluding garage, carport, exterior storage shed, or open or fully screened patios or decks. Based on outside measurements for each story of structure.
BUSINESS ACTIVITY: For commercial/institutional applications only. List number of employees, shifts, and hours of operation, or other information required by Table II, Chapter 64E-6, FAC.

FIXTURES: Mark Floor/Equipment Drains or Others and specify item or "NA" if not applicable.

SIGNATURE Signature of owner or agent. Date application submitted to the CHD with appropriate fees and attachments. The agent must be authorized by the owner to obtain the permit.

The location of your septic system must meet the following setback requirements for any part of the tank and drainfield. Keep this in mind when drawing your scaled site plan.

- 5' from property lines and building (*Setbacks may increase depending on the type of system necessary)
- 10' from water lines
- 50' from Non-Potable Wells
- 75' from all surface water
- 75' from all Private Potable Wells
- 100' from all Non-Community Wells
- 200' from all Community Wells

YOUR SITE PLAN SHOULD INDICATE THE FOLLOWING:

- Show complete address with street and number, city or town and zip code.
- Show dimensions (length and width) of all property lines in feet and show directional North.
- Show proposed location of new septic system. (Where soil test is to be performed, see instructions for marking the area).
- Location of all wells (Public or Private), proposed or existing, on your property or on adjacent property.
- Location of all existing and proposed buildings (showing dimensions), pools, sidewalks and driveways, large trees or other "obstructive areas".
- Property slopes shall be indicated by arrow showing direction of slope. If no slope is present on the property, indicate: property is flat.
- Location of proposed plumbing stub-out from the building.
- Show location of public water meter and proposed water lines if you are on public utilities.
- Location of all surface water or drainage features (canals, ditches) on your property or to adjacent property.
- Location of existing septic systems on property.
- Show location of any recorded easements on the property.
- Show location of all filled areas on property, if applicable.
- Show location of all designated wetlands, if applicable.

INSTRUCTIONS FOR MARKING THE SITE.

1. PLEASE MARK THE SITE BY PLACING A FLAG OR STAKE IN THE CENTER OF THE PROPOSED SEPTIC AREA.
2. PLACE ONE FLAG MARKING THE ENTRANCE TO THE PROPERTY.
3. PROMPT PLACEMENT OF THESE FLAGS, WILL HELP ASSURE QUICK AND ACCURATE RESPONSE BY OUR INSPECTORS AND AVOID A $50.00 REINSPECTION FEE.
4. THE PROPERTY SHOULD BE CLEARED TO BE ACCESSIBLE BY VEHICLE. IF THERE ARE LOCKED GATES OR GUARD DOGS, ARRANGEMENTS SHOULD BE MADE TO PROVIDE ACCESS TO THE SITE.

The Septic Tank Home Wastewater Treatment and Disposal System

What is A Septic Tank System?

A septic tank system consists of a large, watertight tank that receives wastewater from the home plumbing system. The tank is followed by an underground drainfield consisting of a network of perforated pipe or chambers for distributing partially treated water from the septic tank to the soil for final treatment and disposal.

How Does It Work?

Septic tanks contain bacteria that grow best in oxygen-poor conditions. These bacteria carry out a portion of the treatment process by converting most solids into liquids and gases. Bacteria that require oxygen thrive in the drainfield and complete the treatment process begun in the septic tank. If the septic tank is working well, the wastewater which flows out of the tank is relatively clear, although it still has an odor and may carry disease organisms. It should flow only into the drainfield. NEVER ONTO THE GROUND SURFACE OR INTO FLORIDA WATERS!!!

Location

Contaminants can travel long distances in some soils. Therefore, drinking water wells should be located at least 75 feet from any part of a septic tank system. With certain exceptions, septic tanks and drainfields must be located at least 75 feet away from the high water line of ponds, rivers and lakes. Also, the drainfield should be located so that it will not be saturated by surface water drainage or runoff from roof gutters.

Quick Do’s and Don’ts

Do’s

- Know the location and capacity of your septic tank system.
- Have a licensed contractor inspect the tank at least every three years.
- Install the system so that rainfall and surface water will flow away from the drainfield.
- Grow grass above the system.
- Install water conservation fixtures or devices to reduce the total volume of water entering the system.
- Keep plumbing fixtures such as toilets and faucets in good repair to prevent leakage and wasting of water.

Don’ts

- Never flush paper towels, newspapers, wrapping paper, rags or sticks into the system.
- Quickly repair leaky faucets toilets to avoid overloading the system.
- Never over-use ordinary household cleaning chemicals that will be flushed into the system.
- Never allow grease or other bulky waste to enter the system.
- Never allow harsh chemicals such as solvents, industry chemicals, or pesticides to be flushed into the system.
- Never plant trees or shrubbery in the drainfield, or allow vehicles drive or park across the drainfield.

Site Plan Information Documentation Checklist
For NEW, EXISTING and MODIFICATION applications

IMPORTANT! - PLEASE READ CAREFULLY AND PROVIDE ALL REQUESTED INFORMATION, to expedite the permitting process.

**PLEASE ANSWER THE FOLLOWING QUESTIONS, YES OR NO.**
If you answered yes to any of the questions, these items must be drawn on the site plan to scale. This is for existing and proposed components. For offsite features only the dimensions to the property line need to be shown.

<table>
<thead>
