

FAMILY CHILD CARE HOMES WINTER EDITION

BACKGROUND SCREENING

What Does “Retained Prints Expiration Date” Really Mean?

By Julie Oliver, CCLP Supervisor, Homes

There are 2 dates on your clearance letter for background screening that you need to track.

- 1. Eligibility Determination Date:** Per licensing regulations that screening date is good for 5 years.
- 2. Retained Prints Expiration Date:** That date means that your fingerprints will only be retained in the Clearinghouse until that expiration date. As of that date, your fingerprints will no longer be retained in the Clearinghouse. The Clearinghouse only maintains your fingerprints for 5 years.

If your roster is updated, you will receive notification by email when fingerprints are getting ready to expire in the Clearinghouse.

“Please be sure that you are tracking the retention date so that you can do a resubmission and pay a lower cost.”

The notices will begin 90 days prior to expiration. This means that as of the retention date, the fingerprints will no longer be in the Clearinghouse for you or any household member, substitute or employee. The person will have to be re-fingerprinted, paying the full price at the vendor’s.

Please be sure that you are tracking the retention date so that you can do a resubmission and pay a lower cost (approximately \$42.00). If you, a household member, substitute, or employee worked in the healthcare field and were fingerprinted for that job, the retention date is based on when they were fingerprinted for that job.

Please look closely at your clearance letter and the Retained Prints Expiration Date.

With Faith Bornoff, M.Ed. Executive Director

The Pinellas County Child Care Licensing Program office is open Monday through Friday from 8:00 a.m. to 5:00 p.m. Although I am hopeful there is never a reason for you to use our new after-hours service, there is now one available in the event that you do. The system allows you to leave a message for a return call on the next business day when calling outside of our office hours. I am aware that most of your Family Child Care Homes have extended hours to accommodate the families you have enrolled, and emergencies can happen at any hour of the day. If the call is urgent in nature, and cannot wait until the next business day for a return call, there are instructions in the after-hours message that will allow you to contact someone right away.

Our office hours are separate from our operating hours. Please note, your Family Child Care Home could receive an inspection visit during any of your operating hours. “Office hours” refers to the hours our office personnel are available to take calls.

Our Licensing Specialists are very dedicated to their jobs and will work the hours necessary to fulfill their inspection responsibilities.

Child Care Licensing Program

Florida Department of Health in Pinellas County

Winter

Mission:

To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

Ron DeSantis
Governor

Vision: To be the Healthiest State in the Nation

January 18, 2019

Dear Child Care Facility Owner/Operator:

There is an alarming increase in cases of hepatitis A in Florida, including in the Tampa Bay region. In 2018, the Florida Department of Health in Pinellas County (DOH-Pinellas) reported 113 cases of hepatitis A in Pinellas County alone. This is significantly higher than Pinellas County's previous five-year average of three reported cases. Hepatitis A is caused by a virus that attacks the liver and causes severe illness which can lead to hospitalization. The virus can contaminate food and water, spread from person to person and live on surfaces for months if not properly disinfected.

DOH-Pinellas wants to ensure that adults and children are protected from hepatitis A. **The most effective way to prevent hepatitis A infection is to get vaccinated.** The hepatitis A vaccine is safe and highly effective and is given in two doses, 6 to 12 months apart. The hepatitis A vaccine is available at most clinics and pharmacies in Pinellas County. **For a limited time, DOH-Pinellas is offering the vaccine at no cost to all residents and visitors at any of the clinic locations.**

Additionally, washing hands with soap and water for 20 seconds after using the restroom and changing diapers and prior to preparing and eating food can also prevent the spread of diseases such as hepatitis A, flu and norovirus (stomach flu).

The symptoms of hepatitis A can include fever, loss of appetite, nausea, vomiting, diarrhea, abdominal pain, fever, jaundice (yellowing of the skin or whites of the eyes), dark urine (orange or brown) and clay-colored stool (gray or white). **Most children under 6 years of age do not have symptoms when they have hepatitis A.** When symptoms are present, young children typically do not have jaundice, but most older children and adults with hepatitis A have jaundice.

If a staff member or attendee reports these symptoms, they should be excluded from the facility until they have been evaluated by a health care professional and cleared to return to the child care facility.

Along with this letter is an infographic that provides information on hepatitis A. For more information on hepatitis A, please visit www.cdc.gov/hepatitis/hav.

If you have any questions or have any concerns about hepatitis A, please contact DOH-Pinellas at 727-824-6932. Thank you for your assistance in preventing the spread of hepatitis A in Pinellas County.

Sincerely,

Kevin Baker, MPH, CPH, CHES

What You Need To Know About **HEPATITIS A**

HOW IT'S SPREAD:

- Close contact with a person who has hepatitis A
- Eating food or drinking something contaminated with hepatitis A
- Touching a surface contaminated with hepatitis A
- Oral to anal, finger to anal or object to anal sexual contact with an infected partner

Hepatitis A is a virus that can harm your liver. It is passed through the feces of an infected person.

SYMPTOMS:

- Fever
- Feeling tired
- Stomach pain
- Nausea and vomiting
- Diarrhea
- Dark urine
- Gray-colored stool
- Yellowing of skin or eyes

If you think you may have hepatitis A, contact your doctor immediately.

HIGH-RISK GROUPS:

- Those who use drugs
- Those currently homeless or couch-surfing
- Men who have sex with men
- Those recently in jail or prison
- Travelers to countries where hepatitis A is common

PREVENTION:

GET VACCINATED

The Florida Department of Health in Pinellas County and most clinics offer the two-dose hepatitis A vaccine. Visit PinellasHealth.com or call 727-824-6932 for more info.

WASH YOUR HANDS

Use soap and water to wash hands after using the bathroom, changing a diaper and before eating or preparing food.

Line Design Prints

Lots of things are made up of lines! Line designs can be straight, curvy, zigzagged, or wavy. Teach your children how to create lots and lots of line designs by wrapping string around wooden blocks and using them to create line-filled prints. Children can press the wrapped blocks onto plates filled with various colors of tempera paints. Challenge them to fill an entire paper with lines!

What You Need:

- Small boxes or wooden or plastic shapes
- String
- Tape
- Scissors
- Tempera paint
- Paper plates
- White paper

What You Do:

- Look around your learning environment for different types of lines with your children. Encourage them to think of words to describe all the different kinds of lines they find.
- Find several blocks or small boxes to use for creating a piece of art.
- Provide the children with lengths of string to use for wrapping the blocks. Tape one end to the block and then allow the children to wrap the shape—a great way to boost those fine motor skills. Once the string has been used up, tape the other end to secure it in place.
- Now, place small amounts of tempera paint in paper plates.
- Position a piece of paper next to each child along with the wrapped shapes.
- Invite the children to press the string-wrapped shapes in the tempera paint, a then stamp them onto the paper to create a line design.

Use the finished line design artwork as wrapping paper or for decorating the front of a handmade card!

Mission

To protect and promote the health, safety, and mental development of children cared for in children's centers and family child care homes in Pinellas County.

Vision

Every child has access to quality child care and education in an environment that values diversity.

Values

Commitment
Integrity
Quality

Best Practice

Never Accept a Sleeping Baby Into Care.

When a child arrives at your home for care asleep, you need to wake the child up and be sure that the child is alert and responsive before the parent leaves.

Staff Spotlight

Paula Boardman

Senior Clerk, Children's Centers

I'm very excited to start my new career as the Senior Clerk for Centers with the Child Care Licensing Program at Department of Health.

I moved to Florida from North Dakota in July of 2017, so I went from the coldest state to the hottest state! I also lived in Massachusetts for 25 years, so yes, I'm a PATRIOTS fan!

I am married to Thomas Boardman and we have two awesome boys, Jacob and Jared. Jacob, my oldest son, completed his first year of college at the University of North Dakota but made the move to Florida in May of 2018. My younger son, Jared, is attending to Palm Harbor University High School.
