World AIDS Day 2009: Universal Access and Human Rights

This year's WAD theme encourages global leaders to continue their pledge to work towards universal access to HIV/AIDS prevention, treatment and care, recognizing these as fundamental human rights. Valuable progress has been made in increasing access to HIV/AIDS services, yet greater commitment is needed around the world if the goal of universal access is to be achieved. Millions of people continue to be infected with HIV every year. In low- and middle-income countries, less than half of those in need of antiretroviral therapy are receiving it, and too many do not have access to adequate care services.

The protection of human rights is fundamental to combating the global HIV and AIDS epidemic. Violations against human rights fuel the spread of HIV, putting marginalized groups, such as injecting drug users and sex workers, at a higher risk of HIV infection. By promoting individual human rights, new infections can be prevented and people who have HIV can live free from discrimination.

World AIDS Day provides an opportunity for all of us - individuals, communities and political leaders - to take action and ensure that human rights are protected and global targets for HIV/AIDS prevention, treatment and care are met.

Local World AIDS Day Event

Free Health Screenings

When: Tuesday, December 1, 2009

Time: 10 a.m.-2 p.m.

Where: MLK Jr. Neighborhood Family Center

1201 Douglas Avenue
Clearwater, FL 33755

**HIV/AIDS PREVENTION
TREATMENT, CARE AND SUPPORT**

ACCESS FOR ALL
WORLD AIDS DAY DECEMBER 1ST

Special Points of Interest

- Please call **(727) 824-6932** if you need HIV/AIDS reporting forms, specific HIV/AIDS statistical information, would like to have a brief HIV/AIDS Surveillance In-Service for your staff or have your HIV/AIDS cases reviewed in your office.

Pinellas County HIV/AIDS Statistics

AIDS data is cumulative from 1981 to October 31, 2009

HIV data is cumulative from 7/1/97 to October 31, 2009

* Department of Health (DOH) workers who release aggregate HIV/AIDS data outside the Department must comply with the policy of suppressing all non-zero tabulated cells with <3 cases (i.e., all cells containing only 1 or 2 cases), except for geographical areas with populations of 500,00 or more. All marginal totals shown in table form should routinely be inspected to ensure that values of internal cells expressed as '<3' cannot be exactly determined. Consolidation with other data subgroups may be necessary to avoid.
