## Local HIV/AIDS “Stats at a Glance” in the Black Community

### Center for Disease Control and Prevention (CDC) Stats:

\*904,467 people living with HIV through 2011 in the United States

\*96,614 adults living with HIV through 2011 in Florida: Ranked 3<sup>rd</sup> in the nation

\*1,690 people living with HIV/AIDS through 9/2014 in Pinellas County: Ranked 7<sup>th</sup> in the state

### Pinellas County General Population

Blacks Not in Combination with Other Races Non-Hispanic Whites Other

Data from 2013 (US Census Bureau)

The graphs on the left display the adult HIV data available for Pinellas County from 7/1997-9/2014, 34% (621 cases) of those infected are Black, while 56% (1,037 cases) are White. These ratios are staggering when compared to the proportion of Blacks to Whites in Pinellas County's general population. Despite only representing 10.8% of the Pinellas County population, Blacks make up 34% of those who are infected.

### Pinellas County HIV+ Persons

Blacks Not in Combination with Other Races Non-Hispanic Whites Other

Data from July 1997 to September 2014 (Florida Department of Health)

According to the Henry J. Kaiser Family Foundation, Black Americans have been disproportionately affected by HIV/AIDS since the very beginning of the epidemic. Among adults, 1 in 40 black men and 1 in 61 black women were living with HIV in 2013 as compared to 1 in 187 white men and 1 in 1,080 white women. Socioeconomic Status (SES) is a significant contributing factor of this health disparity in Blacks that encompasses poverty, lack of HIV transmission education, unknown HIV status, stigma of the disease, lack of

access to health care, poor social situations, and higher rates of sexually transmitted infections. It's time to break the silence and raise awareness to reduce barriers to testing and treatment services. We must continue to educate at-risk individuals to aid in eliminating this health disparity.

## Current Events

World AIDS Day 2014 was a success at Williams Park with over 250 attendees! There was food, prizes, live entertainment, and more vendors/services than previous years. There were 116 HIV tests done with 0 positive results, 15 Hepatitis C tests with 1 positive result, 11 Syphilis tests with 0 positive results, 20 flu shots, 13 Hepatitis A and 12 Hepatitis B vaccines given. The Florida Department of Health in Pinellas County HIV/AIDS and Hepatitis staff will be collaborating with the Pinellas Planning Partnership on February 6, 2015 to provide 4 Corner HIV Testing from 5-8pm on 18<sup>th</sup> Ave S/9<sup>th</sup> St. S in St. Petersburg as well as distribute “Cupcakes & Condoms” to attendees in recognition of “National Black HIV/AIDS Awareness Day” (February 7). The next HIV testing event will be at Beauty Depot in St. Petersburg on March 6, 2015 from 4-8pm in recognition of “National Women and Girls Day HIV Awareness Day” (March 10). HIV/AIDS Surveillance will provide “Lube-N-Lipstick” for giveaways as a safe sex practice incentive.

\*Department of Health (DOH) workers who release aggregate HIV/AIDS data outside the Department must comply with the policy of suppressing all non-zero tabulated cells with <3 cases (i.e., all cells containing only 1 or 2 cases), except for geographical areas with populations of 500,000 or more. All marginal totals shown in table form should routinely be inspected to ensure that values of internal cells expressed as '<3' cannot be exactly determined. Consolidation with other data subgroups may be necessary to avoid such disclosure, except for geographical areas with population of 500,000 or more.
