ABBOTT ISSUES RECALL OF CERTAIN READY-TO-EAT FORMULAS (RTF)

Abbott Issues Recall of Certain Ready-to-Eat Formulas (RTF)

Tallahassee, Fla. - Abbott has issued a press release voluntarily recalling certain lots of 2 fluid ounce/59 milliliter bottles of Ready-to-Feed (RTF) liquid formula products. For a list of products and lot numbers included in the recall, [click here](#) or call 1-800-986-8540.

According to Abbott, "These products are being recalled because a small percentage of bottles (less than 1%) in the recalled lots have bottle caps that may not have sealed completely, which could result in spoilage." The brands included in this recall are:

- Similac Pro-Total Comfort
- Similac 360 Total Care
- Similac 360 Total Care Sensitive
- Similac Special Care 24
- Similac Stage 1
- Similac Water (Sterilized)
- Similac NeoSure

The Department has notified current WIC participants who may have been issued a recalled product to provide them with alternative options.

In addition to these formula products, the following product has also been recalled:

- Pedialyte Electrolyte Solution

According to Abbott, this recall should not impact overall formula supply. Floridians who use these products should visit Abbott's website to view a list of impacted products or use the lot number checker online. It is important to verify the lot number on the bottom or the side of the bottle, as not all products are included in the recall. If your product is included in the recall, immediately discontinue use of the product and contact Abbott customer service at 1-800-986-8540 for further instructions.

For all feeding-related questions or concerns about your child's health, contact a health care professional or DOH-Pinellas at 727-824-6900. Follow us on social media @HealthyPinellas for updates.
