DOH-PINELLAS LIFTS BLUE-GREEN ALGAE BLOOM ALERT FOR LAKE SEMINOLE BOAT RAMP

Health Alert Has Been *Lifted* After Recent Sample

The Florida Department of Health in Pinellas County (DOH-Pinellas) has lifted the health alert issued on April 26, 2023, for the presence of harmful blue-green algal toxins at Lake Seminole, located at 10015 Park Boulevard North, Seminole. Follow-up water samples taken by the Department of Environmental Protection did not detect algal toxins, indicating the public may resume water-related activities.

It is important that the public exercise caution and good judgement. Blue-green algae blooms can move around or subside and then reappear when conditions are favorable again. Residents and visitors are advised to avoid contact with the water if blooms are observed. The latest sample results can be viewed on **ProtectingFloridaTogether.gov**.

Report symptoms from exposure to a harmful algal bloom or any aquatic toxin to the Florida Poison Information Center. Call 1-800-222-1222 to speak to a poison specialist.
