

## EXPOSURE CONTROL PLAN

In accordance with the Occupational Health and Safety Administration (OSHA), Bloodborne Pathogens standard 29 CFR 1910, 1030, the following exposure plan has been developed by \_\_\_\_\_ (Name of Provider).

Myself and my substitute have valid First Aid and CPR cards. My employee

### Incidents where exposure may occur:

- When applying direct pressure to a bleeding wound, cleaning or bandaging a wound
- When assisting someone who is bleeding
- Cleaning spills of blood or other potentially infectious materials
- Rescue breathing or CPR
- Skin puncture due to a human bite
- When changing a diaper or wiping a child's nose

### Compliance:

Standard Precautions is an approach to infection control in which all human blood and certain human bodily fluids are treated as if known to be infectious for HIV, Hepatitis B, Hepatitis C and other bloodborne pathogens.

### Exposure Control Practices:

- Handwashing: use running water and soap. The use of hand sanitizer is acceptable if running water is not available.
- Gloves will be available; they will be kept \_\_\_\_\_.
- Gloves should be worn when changing diapers, assisting with a bathroom accident, when cleaning up vomit, or any time blood is present.
- The First Aid Kit is located \_\_\_\_\_
- CPR resuscitation masks are kept \_\_\_\_\_ (if applicable)
- Spill control kits are available and kept \_\_\_\_\_ (if applicable)
- Contaminated laundry will be properly bagged, washed, or disposed of.
- Cleaning and disinfecting of exposed area: (wear gloves)
  - Clean using water to remove contamination; followed by a general cleaning using soap and water. When appropriate flush solution down the drain.
  - Disinfect surface using a solution mixed according to manufacturer's instructions. Dispose of all towels/tissues and gloves properly.

### Post Exposure Follow-Up:

An exposure incident means a specific eye, mouth, other mucous membrane nonintact skin, or needle or other sharp object with blood or other potentially infectious material that results from dealing with an incident where exposure has occurred.

An accident/incident will be written and given to the parent to sign on the same day of occurrence. The parent will also be called.

If any or I of my child care personnel (substitute/employee) have been exposed to any blood or human bodily fluids, the person's primary doctor will be called and child care personnel will follow the doctor's instructions.

I have reviewed the Exposure Control Plan prior to working at \_\_\_\_\_ family child care home.
