FAMILY CHILD CARE HOMES SUMMER EDITION JULIE'S JARGON

By Julie Oliver, Homes Supervisor

Time for summer already? That was fast!

We wanted to highlight that as of January 1, 2024, **DCF has shrunk the time-line** for providers to put new staff and/or people moving into their home to a timeframe of **five (5) days**. If your substitute or employee changes, you **MUST** have them on your clearinghouse roster within 5 days. If someone moves in or out of your home, it is the same 5 day window.

We wanted to make sure you were aware of **Preserve Vision Florida**, www.pvfla.org. This is a **free program** that will come to your home and screen children in your child care for free! This is a great way to have these kids screened before they get into school and any problems are missed. You can reach out to Jennifer Whittington at jwhittington@pvfla.org to schedule a screening at your child care home. See page 7 of this newsletter for more information.

Reminder that per regulation, **all sippy cups and water bottles** both brought from home as well as those in the home used throughout the day, must be labeled with **children's first and last names**. Sippy cups and water bottles brought into the home from outside must go home with the child **every day**.

Please be sure that foods served to children must be age appropriate and not a choking hazard. Children under 4 years of age must not be served things such as hotdogs, popcorn, chips, pretzel nuggets, whole grapes, nuts, cheese cubes/sticks and any other food that is similar to the size and shape of the trachea. Food for **infants** must be cut into pieces **1/4 inch or smaller**. Food for **toddlers** must be cut into pieces **1/2 inch or smaller**. This applies to all food items, including those brought in by parents/guardians. Please see this website for help and guidance on food and snacks: <https://www.floridahealth.gov/programs-and-services/childrens-health/child-care-food-program/nutrition/>.

With the many installations of new outdoor play equipment, we ask that you please **keep all paperwork, guides, manufacturing notes, and instructions** associated with the equipment. . All paperwork, receipts, etc., **for turf/ground coverings** must be kept and available as well. This will be helpful if a specialist needs to verify at any time that the equipment is age appropriate.

Please be sure you are **updating your training transcript**, as well as any substitutes and employees with any new training classes that are completed. This does include the 2 news classes required by ELC.

Remember that **doors** to rooms that children are **napping** in must be **open**, and not closed. Per regulations, during naptimes children must be in direct supervision, which means within sight and sound of a child with **frequent visual checks** (every 10-15 minutes). Baby monitors may not be used in replace of the frequent visual checks.

Continued

For large homes, when you are due for a **fire inspection**, please note that you are responsible for calling your local fire department and scheduling the inspection. Please note that we are hearing that you need to plan on scheduling the appointment **2 months in advance**.

Please be sure you **let licensing know** if you are going to be **closed**. If it is around the time that you are due for an inspection, please let your specialist know if you will be closed even for a day. This is very helpful to our staff when they have this information.

As always, as the **hot summer** approaches, be aware of little feet on bare pavement or asphalt, as the sun heating these up can cause burns. When you do take the children outside, shade **and lots of water breaks** are needed and **kiddie pools are not permitted**. Any standing water of any kind cause a child to drown. Please check your play areas carefully and **do not use any water toys that use standing water of any kind**.

If any of your **contact information changes**, such as your landline number, cellphone number or email address, please contact our office. Even if you are unsure if we have the right information, it is better to check with us.

If you have any incidents or accidents, **please call the office at 727-507-4857**. Do not call or email your specialist directly.

We hope this summer the fun heats up and not the weather! If you have questions or concerns, we are in the office 8am-5pm Monday—Friday (except state holidays), and there is always a **specialist on call** for you to talk to. Feel free to give us a call! 727-507-4857.

Julie

Are you watching the ELC site for grants? We suggest checking their site regularly to see if there is a grant you may be able to take advantage of. Please click the picture below to take you to ELC's grants page.

Faith's Food For Thought

Faith Bornoff, M.Ed.
Executive Director

With summer right around the corner, this is a good time to revisit toxic items. It is always surprising the items that are toxic to children, which is why label reading is so important.

We are getting to that time of year where sunscreen is used a lot. Please be sure to take the time to put the sunscreen away and/or out of reach of children after applications. We know it is easier to have it handy, especially if applying it to

multiple children, however in the blink of an eye a child can ingest sunscreen. Making a plan ahead of time to have a location to apply sunscreen near an area where a high shelf or cabinet is a good way to start the habit of always keeping it out of reach, thus avoiding problems and violations.

Blowing bubbles in the summer is another fun activity to do in the shade during the heat of the day with children. This is also another area you must be careful to know what is in the bubble solution you are using. There are non-toxic solutions available for purchasing, and there are many recipes out there for making non-toxic bubble solution. Having the kids make a non-toxic bubble solution and then letting them use it extends the fun for everyone. Pinterest and Google are great places to find recipes for this.

Something we see during inspections on a regular basis are access to adults purses and/or bags. This is a treasure trove of toxic items for children. Everything from hand sanitizer, to pain relievers to prescription medication (and more) can be in these. When starting work for the day, please be sure your own items are locked up and/or out of reach. If you see someone else's items within children's reach, please say something.

And finally, as always, all cleaning product must be kept out of the reach of children at all times. These are some of the most dangerous to children, so being aware of where cleaning products are if they are removed from their normal storage area is something we all must practice. Once the product is no longer being used, return it to its proper place immediately.

Please keep the number to The National Poison Control Center handy at all times:

NEWS FROM EPIDEMIOLOGY

World Hygiene Day

By: Rachel J. Ilic, MPH, CPH, CIC

May 5 is recognized as World Hand Hygiene Day!

HAND WASHING

Stay healthy. Wash your hands!

Researchers estimate that if everyone routinely washed their hands, 1 million deaths a year could be prevented.

Washing your hands is important and vital in preventing the spread of germs. Here are some important instances when to wash your hands to help control the spread of illness:

- After using the bathroom
- After coughing or sneezing
- After cleaning a child who has gone to the bathroom
- After touching books and money
- Before preparing food
- Before eating
- After petting an animal

The Centers for Disease Control and Prevention (CDC) Clean Hands Count campaign aims to:

- Improve healthcare provider adherence to CDC hand hygiene recommendations
- Address the myths and misperceptions about hand hygiene
- Empower patients to play a role in their care by asking or reminding healthcare providers to clean their hands

According to the World Health Organization (WHO), there are 5 Moments of Hand Hygiene for healthcare providers. If you are a provider, see if you can fill in the blanks for the attached document!

Remember,
Stay healthy. Wash your hands!

Board Member Spotlight

Charlie Justice
Pinellas County Commissioner
Representative

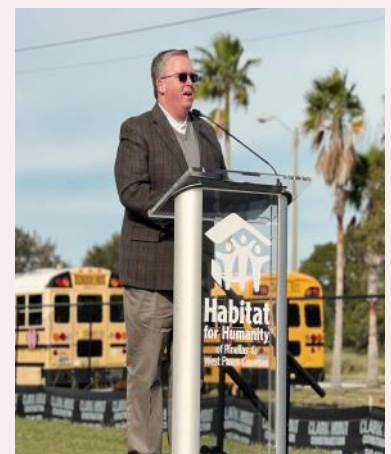

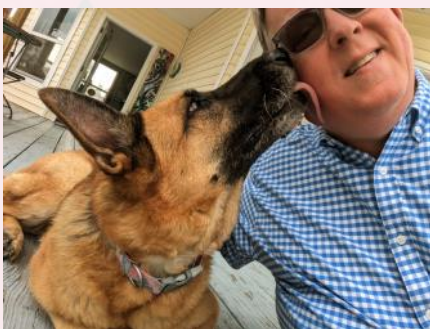

Recently **Commissioner Charlie Justice** was appointed to the Pinellas County Licensing Board as a member from the Board of County Commissioners. A Pinellas Native, Commissioner Charlie Justice was born and raised in St. Petersburg. Commissioner Justice graduated from Pinellas County public schools, and earned degrees at St. Petersburg College and the University of South Florida.

In 2000, he was elected to the Florida House of Representatives. In 2006, Commissioner Justice won a seat in the Florida Senate. Coinciding with his time as a legislator, Commissioner Justice had a career at the University of South Florida St Petersburg creating the Office of Leadership Development and Programming, where he worked connecting students to leaders and leadership opportunities in the Bay Area.

During Commissioner Justice's 10 years of legislative service, he was recognized as a Champion of Education, defender of personal privacy, advocate for seniors and military veterans, and a staunch protector of Florida's natural resources.

Commissioner Justice was elected countywide to a seat on the Pinellas County Commission in 2012, and re-elected subsequently in 2016 and 2020. During his Commission Service, he was elected by his peers to serve as Chairman in both 2016 and 2022. Commissioner Justice's service also includes time as Chair of the Tourist Development Council, Chair of the Historic Preservation Board as well as time on the Boards of the Area Agency on Aging of Pasco-Pinellas, the Pinellas Suncoast Transit Authority, the Board of Trustees of the Pinellas Law Library, as well as many others.

Commissioner Justice is married to Kathleen. They reside in west St Petersburg with their two daughters.
