Julie's Jargon

By Julie Oliver, Homes Supervisor

New Attestation of Good Moral Character

LY CHILD CARE HOMES

Recently DCF sent out an updated Attestation of Good Moral Character (AGMC). If you already have an AGMC on file you do not need to complete the new one. Although if you did complete the new AGMC for you, any household members over 18 years old and your substitute and send to your licensing specialist that is ok. If you have any new household members or substitute they must complete the new AGMC.

This is just a reminder that if you have internet access you can go to our website, <u>www.pclb.org</u> to access the updated forms. On the home page on the left hand side click on <u>Family Child Care</u> <u>Home Forms</u>. All forms are listed alphabetically. Using the updated forms and filling them out correctly will help you to maintain compliance.

New Number for DCF Help Desk for Background Screening

850-300-4247

Pools

In addition to home swimming pools, please remember that wadding pools and inflatable slides are not permitted. The regulations state that **"Wading pools, including inflatable water slides with landing area where water collects, are prohibited."**

Reporting Incidents and Accidents

If you have an incident or accident that needs to be reported to the license board, especially if it involves police, 911 services, or abuse, please call the office and speak to someone directly. **Please do not email your specialist, also do not leave them a voicemail.**

Call the office at 727-507-4857 after hours or on the weekends. When you call, you will have the option to leave a message for someone to call you back on the next business day, or call the number in the voice mail to speak to someone if your report is an **emergency situation** that cannot wait until the next business day. **Incidents and accidents are must be reported to child care licens-ing within 24 hours per regulation**.

We really appreciate all that you do each day to provide safe and healthy environments that allow children to flourish and thrive. Please let us know if we can help you in any way,

FAMILY CHILD CARE HOMES

SUMMER EDITION

Emergency Preparedness

It's that time of year!

Hurricane Season begins on June 1. Although we hope that this year's season is uneventful, we must be diligent and prepared.

Last year's hurricane season was busier than usual, and it gave us the opportunity to see our processes in full swing. Overall, we were not pleased with the options available for post storm reporting, so we have added a post event survey link to the Emergency Preparedness Booklet for your convenience.

Please keep in mind that child care regulations require licensed programs to report their operational status within 24 hours of an event. We hope that this new survey option makes it easier for you to complete this report-

ing requirement. You will find the newly updated Emergency Preparedness Booklet attached to this publication.

It is also important to note that the PCLB staff work at the local Special Needs Shelters when they are open, so our office will be closed. Please do not call/email our office, or your licensing specialist, to give your post storm update as the message will not be received in a appropriate timeframe. This is why the special emergency hotline and survey link are available to you for post event reporting.

Be prepared to provide the best contact person and phone number on the survey. If your center is closed following a storm event, we will need this information to set up an inspection to reopen your center, or answer any questions.

Please read the attached Emergency Preparedness booklet and let us know if you have any questions. Let's hope that being over prepared leads to a slow hurricane season and that this information is not needed this year.

WILY CHILD CARE HOMES

NEWS FROM EPIDEMIOLOGY By: Rachel J. Ilic, MPH, CPH, CIC

Raw Milk Consumption

Cow's milk pasteurization was introduced in Chicago in 1908 but wasn't widely adopted until 1916. Public health officials became concerned about bovine tuberculosis transmission from cow's milk to humans and estimated that as many as 10% of all human tuberculosis cases were caused by infection via milk consumption. In 1910, a tuberculosis epidemic spread through Illinois infecting over 300,000 cattle and because tuberculosisfree herd certifications became more difficult to manage, pasteurization became popular.

In 1924, the U.S. Public Health Service developed the Standard Milk Ordinance for voluntary adoption by state and local agencies and is now called the Grade "A" Pasteurized Milk Ordinance (PMO). More states began adopting the PMO approach in subsequent decades and infections from milk borne disease outbreaks decreased from 25% (prior to 1938) to less than 1% (2015).

While tuberculosis infections are less of a concern in the United States, there are other human pathogens that raw milk can be contaminated with. Several countries have monitored the presence of different type of pathogens in raw milk and some studies have identified almost a third of all milk samples contained at least 1 type of pathogen such as Campylobacter jejuni, Salmonella, Brucella and Listeria monocytogenes.

The FDA notes that raw milk is particularly unsafe for children due to their vulnerability and susceptibility to certain pathogens including E. coli O157:H7 which can lead to the development of Hemolytic Uremic Syndrome (HUS). The FDA notes several claims for the benefits of raw milk and provides an explanation based on scientific literature here.

The Centers for Disease Control and Prevention (CDC) notes the risk for Influenza A (H5N1) infection from raw milk consumption and advises against consumption as a way to obtain antibodies to prevent future illness. H5N1 can be found in the mammary glands of cattle which can be passed to humans if pasteurization is not performed.

Raw milk can contain a variety of disease-causing pathogens and has frequently been identified as the source of disease outbreaks in the United States. Studies indicate over 200 recorded outbreaks since 1993 with recent investigations showing a 4-fold increase in outbreaks reported during 2007-20121. While the investigations are well documented, these numbers likely represent a small proportion of illnesses associated with raw milk consumption due to lack of healthcare seeking behavior for gastrointestinal related illnesses.

8751 Ulmerton Road, Suite 2000

Largo, FL 33771

Time of Class:

Cost of Class: \$25

Please call 727-507-4857 to register

9:00a.m. - 1:00p.m.

These classes are subject to cancellation based on restrictions and requirements in the state at that time. Call the CCLP office prior to class if you need to reschedule to avoid repaying the registration fee. Any persons with a disability requiring reasonable accommodations should call the CCLP office no later than two (2) weeks prior to the training.

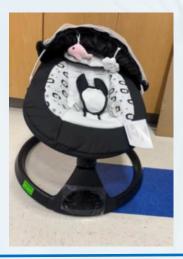

FAMILY CHILD CARE HOMES

SUMMER EDITION

CPSC Warns Consumers to Immediately Stop Using Queerick Infant Swings Due to Risk of Serious Injury or Death from Suffocation;

Name of product: Queerick Swings

Hazard: The swings were marketed for infant sleep and have an incline angle greater that 10 degrees in violation of the Safe Sleep Babies Act and the federal Infant Sleep Products Rule. In addition, the swings fail to meet mandatory warning requirements for infant swings. These swings create an unsafe sleeping environment for infants and can cause death or serious injury to infants.

Consumer Action: CPSC urges consumers to stop using the infant swings immediately and dispose of them. Button cell and coin batteries are hazardous. The battery in the remotes should be disposed of or recycled following local hazardous waste procedures. Do not sell or give away these hazardous infant swings.

Product Safety Warning Date: May 15, 2025

Primark Recalls DTR Plush Bag Stitch and DTR Plush Bag Angel Due to Choking and Ingestion Hazards

Hazard:

The zipper pull on the back of the plush bag can detach, posing a risk of serious injury or death from choking and/or ingestion of the zipper pull.

Remedy:

Consumers should immediately take the recalled plush bags away from children, stop using them and return them to a Primark store for a full refund in the form of original payment.

CPSC Consumer Information Hotline

Contact this toll-free number if you have questions about a recall:

800-638-2772 (TTY 301-595-7054) Times: 8 a.m. – 5:30 p.m. ET. Messages can be left anytime.

Call to get product safety and other agency information and to report unsafe products.

FAMILY CHILD CARE HOMES Creative Corner

SUMMER EDITION

Fun, educational activities kids LOVE!

https://myboredtoddler.com/easy-crafts -for-toddlers/

Finding crafts for young children can be difficult. This website offers multiple craft ideas to keep hands busy. Things such as a paper plate lion, summer flower craft, or a newspaper puppy paper craft. Each link for each craft also offers many tips and tricks as well as instructions on how to create the crafts.

How did you get your start in this field?

I started college with plans to become an elementary school teacher.

After getting my associates degree and taking some education courses, I interned with Pinellas County Schools and took a job with a before/after care provider. I loved working with children, and this would then lead me to becoming a pre-school teacher briefly.

What is your favorite part of being on this team?

My favorite part is working with the team to protect the children/families of Pinellas County.

What did you do before this role?

I switched my major to a Public Policy and Administration having a deep interest in policy, politics, and government.

Since graduating with my Bachelor's I have worked in city administration, for a state college, and a youth counseling shelter non-profit agency. I feel this is a position that incorporates all of my areas of interest: government, policy, serving our local community, and protecting our families.

Tell us about your family.

I have a rather large family, and we have been living in Pinellas County almost 30 years.

What do you love to do when you are not at work? Do you have any hobbies?

I am a homebody, but I do love the beach, road trips, movie nights, exotic foods, and keeping up with pop culture.

What do you think makes a great childcare provider?

I think what makes a great provider is passionate, diligent staff, good organization, and excellent leadership.

Child Care Licensing Program

Florida Department of Health in Pinellas, 8751 Ulmerton Road, Suite 2000, Largo, Florida 33771 727-507-4857 pclb.org

Mission

To protect and promote the health, safety, and mental development of children cared for in children's centers and family child care homes in Pinellas County.
