

FAMILY CHILD CARE HOMES

SPRING EDITION

Be Prepared for Severe Weather

By Julie Oliver, Homes Supervisor

Greetings to our Licensed Family Child Care Providers! I don't know about you, but it seems to us that this year is already flying by. We had a mild but also cool winter and now we are reminded that summer is right around the corner. We are including some information on severe weather. It is important that we make sure that we are all prepared to safely survive in our business that are our homes.

One of the most dangerous hazards is a tornado. Tornadoes are spawned by a thunderstorm or because of severe weather associated with hurricanes. Wind speeds in an intense tornado are likely to rise above 200 miles per hour. These violent winds are what make tornadoes so deadly. They can uproot and snap trees, down power lines, move or pick up cars and trucks, and destroy homes.

Tornadoes are not usually associated with the Sunshine State, but Florida ranks 5th nationally in the annual average number of tornadoes and ties for 6th in tornado fatalities with an annual average of 4 fatalities per year.

Please be sure you are practicing your emergency drills for tornados and lockdowns. Although regulations state that one of each is practiced in your licensing year, it is ok to practice more than once, especially when children in your care change. Remember that fire drills are practiced monthly at varying times of the day.

Safety Tips: How can you be prepared for Thunderstorms and Tornadoes?

- Learn your local severe weather/tornado warning system.
- Alert Pinellas** is an emergency notification system that is used by Pinellas County public officials, municipalities, and the Sheriff's Office and to notify citizens within Pinellas County. You can sign up for free to receive emergency notifications via phone, text, or email. Sign up here: [Pinellas County, Florida -Alert Pinellas](#)
- Know the difference between a tornado watch and a tornado warning.
 - Tornado Watch:** Issued by the National Weather Service when tornadoes are possible in your area. You should remain alert for approaching storms.
 - Tornado Warning:** Indicates that a tornado has been sighted in your area or is indicated on weather radar. You should proceed to safe shelter immediately.
- Know the signs of a tornado
- Discuss thunderstorm and tornado safety with all members of your household and create an emergency plan.
- Pick a safe place in your home for household members and or the children in care to gather during a thunderstorm/tornado warning. This should be away from windows, skylights and glass doors that could be broken by strong winds or hail
- If you are under a thunderstorm warning, go inside when you

hear thunder and move from outdoors into a building or car with a roof.

- Create an emergency preparedness kit.

More information about thunderstorm and tornado hazards and what you can do to protect yourself and others can be found at [NWS - Thunderstorms](#), [NWS - Tornados](#), [NOAA - Tornados](#), [FDEM - Tornados](#), and [FDEM - Thunderstorms](#).

Executive Director**

We at PCLB hope that you have no incidents to report for the remainder of 2023. But if you do, please remember to always report it verbally to a staff member. You may do this by calling our office direct at 727-507-4857. Should the incident occur after hours, there will be a message at our number letting you know how to reach a member of our staff. Please do not leave incident information on a staff member's voice mail or in email. These message may not be received right away due to field activities and staff leave. We appreciate you partnering with us to ensure all incidents are handled in the most effective way possible. Thank you for all you do for the children of Pinellas County every day!

NEWS FROM EPIDEMIOLOGY Increase in Chickenpox Cases—2023

Varicella (chickenpox) is a viral infection that causes an itchy blister-like rash. After initial infection, the virus can stay in the body and reappear later in life as Shingles. Chickenpox can cause serious infection and complications in babies and others with weakened immune systems including pregnant women.

Chickenpox spreads through the air but may also occur by direct contact with blister fluid. Chickenpox is highly contagious, infecting between 61-90% of those who are susceptible. Those with chickenpox are considered contagious until all lesions have crusted over, typically five days, and should be excluded from care during this time. The best way to prevent chickenpox infection is through vaccination. The vaccine is given in a two-dose series with the first dose given between age 12-15 months and the second at 4-6 years.¹ Vaccines are available through the Florida Department of Health in Pinellas County (DOH-Pinellas) on a walk-in basis.

Chickenpox typically follows a seasonal pattern with highest occurrence in winter and early spring.² In January 2023, DOH-Pinellas identified an increase in chickenpox cases compared to the same time last year (see graph below). Similarly, chickenpox cases increased statewide with 47 cases reported in January 2023, while 23 were reported in 2022.

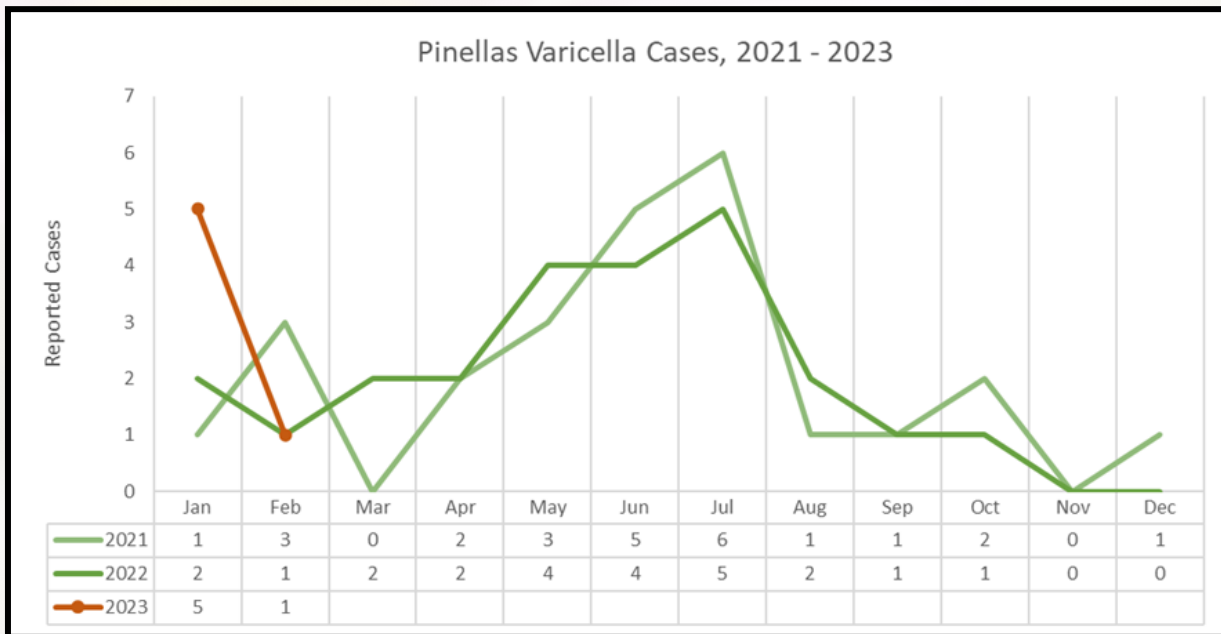

Chickenpox cases are reportable in Florida and should be reported by the diagnosing provider.

Creative Corner

Fun, educational activities kids LOVE!

Here is a fun and cute spring craft from
'Glued to My Crafts'

Q-Tip Painted Handprint Cherry Blossom Tree

Craft Supplies Needed:

1. Unused Q-Tips
2. White Craft Paint
3. Various Shades of Pink Craft Paint
4. Light-Blue and Brown Cardstock Paper
5. Small paper plate
6. Basic craft scissors
7. Pencil or Pen
8. Glue Stick

Directions:

- Trace the child's handprint/arm onto the brown cardstock and cut it out. (this will be used for the trunk of the tree)
- Glue the hand/arm to the light-blue cardstock
- Put puddles of different color pinks and the white paint on the paper plate
- Have the child dip the Q-Tip into the paint and then dab onto the branches of their "handprint tree" until the tree is nice and full
- Let dry completely before displaying proudly!

FAMILY CHILD CARE HOMES

SPRING EDITION

Board Spotlight

In Spring of 2022, Jennifer Mekler joined the Pinellas County Licensing Board as the representative from Pinellas County Schools. Jennifer began her career in education as a teacher in Pinellas County. Of the thirteen years she spent in the classroom, eleven years were spent teaching kindergarten. After teaching, she left the classroom to serve the district as a building administrator for ten years in both the assistant principal and principal roles. During her time as a building administrator, she

worked to build a cohesive program to support a growing population of English Language Learners. She also developed a family involvement program that focused on keeping students engaged in learning outside the school day by working with local businesses and families. Her work with teachers continuously focused on professional collaboration around teaching and learning and creating cohesive teams increasing

the rigor of student work.

Mekler (far left) at the PCS Showcase

Mekler (2nd from right) at the Collard Green Festival 2023

is in her first year at Auburn University studying Animal Science.

Mrs. Mekler is now the Director of Early Childhood Education. In this role, she has enjoyed getting involved with different community organizations and events. She leads an amazing team of educators that are committed to early childhood education for each child, every day.

Jennifer and her husband Kevin are both graduates of Pinellas County Schools and have raised two children in the area. Both of their children graduated from Palm Harbor University High School and are attending college. Their son, Mackenzie is in his second year at University of Florida studying Microbiology and their daughter, Madeline, is in her first year at Auburn University studying Animal Science.
